

# Anchor Recommendations for Non-structural Applications

Anchor Details		Recommended Applications [1]							Design Parameters							
		Partitions		Ceilings		Services			Design Values [2]			Setting Details [4]				
Anchor short Description	Size [mm]	Top of wall	Bottom of wall	Seismic Brace	Wire Hanger	Seismic Brace	Rod Hanger	Seismic Brace	Seismic category	Tension [kN]	Shear [kN] [5]	$h_{\text{effective}}$ [mm]	$h_{\text{nominal}}$ [mm]	Min slab Thickness [mm]	Critical Edge Distance [mm]	Critical Spacing [mm]
<b>HUS3</b> ETA-13   1038  <b>Screw anchor</b> <i>High performance</i>	6	✓	✓	✓	✓	✓	✓	✓	C1	1.4	3.2   1.6	30	40	80	45	90
	8	✓	✓	✓		✓		✓	C1	6.0	7.9   4.0	46	60	100	70	140
	10	C2	2.1	9.8   3.6	55	70	120	85	170							
		C1	9.2	11.2   5.6	59	75	130	90	180							
	C2	6.3	17.1   5.9	67	85	140	110	220								
	<b>HST3</b> ETA-98/0001  <b>Expansion anchor</b> <i>Ultimate performance</i>	8			✓		✓	✓ <sup>[3]</sup>	✓	C1	5.0	13.3   6.6	47	45	80	71
10		C2	2.0	7.9   3.8	47	45	80	71	141							
		C1	8.0	20.6   10.3	60	68	100	90	180							
12		C2	6.9	15.2   7.60												
		C1	11.9	31.2   15.6	70	80	120	105	210							
C2		11.9	22.9   11.4													

**Notes:-**

[1] The design requirements for an anchor or fixing for a given applications are to be specified by the design engineer. The corresponding table is intended to serve as a recommendation only.

[2] Values are valid for 20MPa strength concrete or greater. The performance can be optimised further by re-calculating with a higher material strength. Values stated are design values.

[3] An additional rod coupler is required to attach a threaded rod to the HST3 anchor.

[4] Please contact Hilti engineers to re-verify anchor capacities when the spacing, edge distance, fastening thickness, or  $h_{\text{effective}}$  cannot be achieved as per the provided table. See anchor box for full setting details. i.e, drill hole diameter, hole cleaning, and tightening torque.

[5] Values shown are for cases when  $\alpha_{\text{gap}} = 1.0$  and 0.5 respectively. See EN 1992-4 annex C.5, and table 6.1 or contact a hilti engineer for more details.
